Description of the machine

Temporary edge protection, class A in accordance with EN 13374:2013+A1:2019.

Examinations and tests

The edge protection has been tested by means of calculations against the provisions of EN 13374:3013+A1:2019. Subsequently, the calculation results were validated by means of tests carried out on 01-07-2021. The system was also examined for the other provisions of EN 13374:3013+A1:2019.

The technical file, drawn up by the manufacturer, has also been checked for content.

Results

Examination:

After the examination, the product and the technical file were found to be in accordance with the requirements. No deficiencies were found during the examination and the functional tests passed with no comments.

Technical file:

The technical file was found to be complete.

Calculations:

All applicable load cases, as prescribed in EN13374:2013+A1:2019 are considered. There are no comments on the calculations performed.

CE-marking and EC-declaration:

Not applicable for this product.

Conclusion

Based upon the results of the type examination Aboma issues a type examination certificate.

The type examination certificate is only valid for products which are in conformity with the same specifications as the type certified product.

The certificate is issued based on the requirements that are valid at the date of issue.

Disclaimer

In case of changes of the product specifications, changes in the requirements or changes in the state of the art the certificate holder shall request Aboma to reconsider the validity of the certificate.

Aboma has the responsibility for the validity of the type examination. Aboma communicates every major changes which can affect the validity of the type examination certificate to the manufacturer.

The manufacturer requests Aboma to reconsider the validity of the certificate every five years.
